### **DETAILED ACTION**

Claims 1-31 are pending in the instant application. Claims 32-44 have been canceled.

#### ***Response to Final Action***

Applicant's response filed on 2/17/09 is acknowledged. The rejections and objections made in the previous office action are withdrawn in view of the terminal disclaimer filed. The restriction requirement mailed on 5/20/08 is withdrawn.

#### ***Terminal Disclaimer***

The terminal disclaimer filed on 2/17/09 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent Application Number 10/551,709 has been reviewed and was accepted. The terminal disclaimer has been recorded.

#### ***Reasons for Allowance***

The present invention is directed to biaryl substituted pyrazoles as sodium channel modulators of formulae (I) to (IV). The closest prior art of record is Finar, et al., Journal of the Chemical Society, Section B: Physical Organic, Vol. 2, pages 211-214, 1968, which teaches a similar pyrazole compound, but the instant application has a proviso, which eliminates the Finar compound. Finar only teaches the one species and does not provide the requisite motivation to make additional species as claimed in the instant application. Therefore the instant claims 1-31 are allowable over the prior art.
